

Sky Hook

This toy is so enjoyable to play with for adults and children.

Materials: $\frac{3}{4}$ pine or other wood 4" long and 1 $\frac{3}{8}$ high.

Tools: Band saw or scroll saw or coping saw

The pattern is 1/1 so just cut it out and use it for a pattern. You might want to make a permanent pattern. I made 16 last month for a collage professor.

The trick is that whatever you put in the slot must be stiff enough to bend back towards your hand.
